# **CLASSICS** Common strains for traditional brewing

<ul> <li>✓ BRITISH ALE I OYL-006</li> <li>BRITISH ALE I OYL-006</li> <li>A productive, brewer-friendly, top cropper attributed to a historic London brewery whose lab once hosted Louis Pasteur. It drops fast and clear, and is clean and crisp at louis Pasteur. It drops fast and clear, and is clean and crisp at louis Pasteur. It drops fast and clear, and is clean and crisp at louis Pasteur. It drops theightened esters and a lightly tart, dry finish at upper ranges.</li> <li>BRITISH ALE V I</li> <li>BRITISH ALE V I</li> <li>OYL-011</li> <li>British Ale V is undeniably the gold standard for brewing NEIPAs. It gives a huge, fruity boost to juicy hop character along with stable haze and residual sweetness. This strain's signature characteristics are all the hallmarks of a great hazy IPA.</li> <li>DIPA ALE OYL-052</li> <li>A strong fermenter popularly referred to as 'Conan.' Its peach, apricot and pineapple notes are steroids for hops, complementing modern fruity hop profiles in particular. A diacetyl rest is suggested if fermented in the lower temperature range. Many brewers enjoy blending DIPA with British V (OYL-011) for enhanced haze and complex, fruity ester profile.</li> <li>EXTRA SPECIAL Formerly British Ale VIII OYL-016</li> <li>EXTRA SPECIAL Formerly British Ale VIII OYL-016</li> <li>Presenting banan and clove, the esters turn up with increased temperatures, wort denisty and decreased pitch rate, or stay muted at lower temperatures where clowe stands out. Over pitching can lessen the banana. Sulfur conditions out.</li> <li>Floculation: Low Attenuation: 64-75% (18-24°C) Alcohol Tolerance: 10%</li> <li>Floculation: Low Floculation: clow-75% Temperature Range: 64-75% (18-24°C) Alcohol Tolerance: 10%</li> <li>Floculation: clow-75% Temperature Range: 64-75% (18-24°C) Alcohol Tolerance: 10%</li> </ul>	Compares to: WY1318 See Engineered Versions: Cosmic Punch (OYL-402) Helio Gazer (OYL-405) See Engineered Versions: Little DIPA (OYL-407) Compares to: WY1968, WLP002 Compares to: WY3068, WLP300 See Engineered Version: Bananza (OYL-400) Compares to: WY1084, WLP004 See Hybrid Version: Gulo Ale (OYL-501) Compares to: WLP029
OYL-011       If gives a huge, fruity boost to jucy hop character along with stable haze and residual sweetness. This strain's signature characteristics are all the hallmarks of a great hazy IPA.       Attenuation: 71–75% Temperature Range: 64–74°F (18–23°C) Alcohol Tolerance: 10%         DIPA ALE       A strong fermenter popularly referred to as 'Conan'. Its peach, apricot and pineapple notes are steroids for hops, complementing modern fruity hop profiles in particular. A diacetyl rest is suggested if fermented in the lower temperature range. Many brewers enjoy blending DIPA with British V (OYL-011) for enhanced haze and complex, fruity ester profile.       Flocculation: Very High Attenuation: 65–72°F (18–22°C) Alcohol Tolerance: 11%         EXTRA SPECIAL       A ridiculously thorough flocculator thought to be from a highly regarded English ESB. This strain has unique fruitiness and noticeable finishing sweetness. Drops out quickly and completely. Easy to crop, but needs a diacetyl rest. To enhance the fruit, ferment up at the recommended temperature celling.       Flocculation: Low Attenuation: 73–77% Temperature Range: 64–75°F (18–24°C) Alcohol Tolerance: 10%         HEFEWEIZEN ALE I OYL-021       A classic German wheat strain, it's a cloudy, big top cropper. Presenting banana and clove, the esters turn up with increased temperatures, wort density and decreased pitch rate, or stay muted at lower temperatures, wort density and decreased pitch rate, or stay muted at lower temperatures where clove stands out. Over pitching can lessen the banana. Sulfur conditions out.       Flocculation: Medium Low Attenuation: 73–77% Temperature Range: 64–75°F (18–24°C) Alcohol Tolerance: 10%         INISH ALE OYL-005       Ireland's storied stout is thought to be balanced by this dry, crisp, lightly fruity, versat	Cosmic Punch (OYL-402) Helio Gazer (OYL-405) See Engineered Versions: Little DIPA (OYL-407) Compares to: WY1968, WLP002 Compares to: WY3068, WLP300 See Engineered Version: Bananza (OYL-400) Compares to: WY1084, WLP004 See Hybrid Version: Gulo Ale (OYL-501) Compares to: WLP029
OYL-052apricot and pineapple notes are steroids for hops, complementing modern fruity hop profiles in particular. A diacetyl rest is suggested if fermented in the lower temperature range. Many brewers enjoy blending DIPA with British V (OYL-011) for enhanced haze and complex, fruity ester profile.Attenuation: 72–80% Temperature Range: 65–72°F (18–22°C) Alcohol Tolerance: 11%EXTRA SPECIAL Formerly British Ale VIII OYL-016A ridiculously thorough flocculator thought to be from a highly regarded English ESB. This strain has unique fruitiness and noticeable finishing sweetness. Drops out quickly and completely. Easy to crop, but needs a diacetyl rest. To enhance the fruit, ferment up at the recommended temperature ceiling.Flocculation: Very High Attenuation: 67–71% Temperature Range: 64–72°F (18–22°C) Alcohol Tolerance: 9%HEFEWEIZEN ALE I OYL-021A classic German wheat strain, it's a cloudy, big top cropper. Presenting banana and clove, the esters turn up with increased at lower temperatures where clove stands out. Over pitching can lessen the banana. Sulfur conditions out.Flocculation: Low Attenuation: 73–77% Temperature Range: 64–75°F (18–24°C) Alcohol Tolerance: 10%IRISH ALE OYL-005Ireland's storied stout is thought to be balanced by this dry, crisp, lightly fruity, versatile, and powerful strain. A good fermenter withFlocculation: Medium Attenuation: 69–75%	Little DIPA (OYL-407) Compares to: WY1968, WLP002 Compares to: WY3068, WLP300 See Engineered Version: Bananza (OYL-400) Compares to: WY1084, WLP004 See Hybrid Version: Gulo Ale (OYL-501) Compares to: WLP029
Formerly British Ale VIII OYL-016regarded English ESB. This strain has unique fruitiness and noticeable finishing sweetness. Drops out quickly and completely. Easy to crop, but needs a diacetyl rest. To enhance the fruit, ferment up at the recommended temperature ceiling.Attenuation: 67–71% Temperature Range: 64–72°F (18–22°C) Alcohol Tolerance: 9%HEFEWEIZEN ALE I OYL-021A classic German wheat strain, it's a cloudy, big top cropper. Presenting banana and clove, the esters turn up with increased temperatures, wort density and decreased pitch rate, or stay muted at lower temperatures where clove stands out. Over pitching can lessen the banana. Sulfur conditions out.Flocculation: Low Attenuation: 73–77% Temperature Range: 64–75°F (18–24°C) Alcohol Tolerance: 10%IRISH ALE OYI-005Ireland's storied stout is thought to be balanced by this dry, crisp, lightly fruity, versatile, and powerful strain. A good fermenter withFlocculation: Medium Attenuation: 69–75%	WY1968, WLP002 Compares to: WY3068, WLP300 See Engineered Version: Bananza (OYL-400) Compares to: WY1084, WLP004 See Hybrid Version: Gulo Ale (OYL-501) Compares to: WLP029
OYL-021       Presenting banana and clove, the esters turn up with increased temperatures, wort density and decreased pitch rate, or stay muted at lower temperatures where clove stands out. Over pitching can lessen the banana. Sulfur conditions out.       Attenuation: 73–77%         IRISH ALE       Ireland's storied stout is thought to be balanced by this dry, crisp, lightly fruity, versatile, and powerful strain. A good fermenter with       Flocculation: Medium Attenuation: 69–75%	WY3068, WLP300 See Engineered Version: Bananza (OYL-400) Compares to: WY1084, WLP004 See Hybrid Version: Gulo Ale (OYL-501) Compares to: WLP029
OY1-005 lightly fruity, versatile, and powerful strain. A good fermenter with Attenuation: 69–75%	WY1084, WLP004 See Hybrid Version: Gulo Ale (OYL-501) Compares to: WLP029
fruit at the lowest recommended temperatures, which increases in Alcohol Tolerance: 12% complexity at higher temperatures (64°F/18°C+). Successful in dark and high gravity beers. Sláinte!	WLP029
KOLSCH II       This Kolsch strain is warmer fermenting than Kolsch I (OYL-017), flocculates much better and clears more quickly, so is a little easier to manage. It is a lager-like ale strain that's lightly fruity, crisp and clean with a hint of sulfur that disappears with age to leave a clean ale. Accentuates hop flavors.       Flocculation: Medium-Low Attenuation: 72–78% Temperature Range: 65–69°F (18–21°C) Alcohol Tolerance: 10%	I
PACIFIC NW ALE       A strain from the Pacific NW, originally from the UK, the Pacific NW       Flocculation: High         OYL-012       Ale strain presents a relatively neutral profile with notes of malt and light fruit that add depth of flavor. It is a healthy flocculator.       Flocculation: High         Attenuation: 67–71%       Temperature Range: 65–75°F (18–24°C)         Alcohol Tolerance: 10%       Alcohol Tolerance: 10%	Compares to: WY1332, WLP041
SCOTTISH ALE       The Scottish Ale strain is a flocculent, versatile and reliable house       Flocculation: High         OYL-015       strain that produces neutral to complex-and-malty profiles in its fairly wide temperature range. Hop character is not muted by this strain. More esters emerge at higher fermentation temperatures.       Flocculation: High         Alcohol Tolerance: 10%       Alcohol Tolerance: 10%	Compares to: WY1728, WLP028
TROPICAL IPA O       A unique Saccharomyces strain that produces delicate, tart, tropical mango and pineapple fruit characteristics with a clean finish. Try higher fermentation temperatures to really bring out the tropical aspects. It's stubbornly non-flocculent, but the results are worth the trouble.       Flocculation: Low Attenuation: 82–90% Temperature Range: 70–85°F (21–29°C Alcohol Tolerance: 10%)	Compares to: WLP644
WEST COAST ALE I I O       "Chico" is a reliable, versatile and popular neutral foundation       Flocculation: Medium-Low         OYL-004       for displays of malts and hops. Highly attenuative and moderately       Attenuation: 73-80%         Under 66°F (19°C).       Temperature Range: 60-73°F (16-23°C)	Compares to: WY1056, WLP001 See Engineered Versions: West Coast I + (OYL-430) Star Party (OYL-402)
WEST COAST ALE II OYL-009West Coast Ale II is a consistent, well-flocculating, well-attenuating and easy-clearing neutral strain. Slightly fruitier than West Coast Ale I (OYL-004) and clean with a lightly perceptible nuttiness, its subtle citrus character finishes slightly tart at the cool end, and more fruit character emerges as fermentation temperatures increase.Flocculation: Medium Attenuation: 72–76% Temperature Range: 60–72°F (16–22°C)	Compares to: WY1272, WLP051
BELGIAN ALE A O       As one of the few highly flocculent Belgian ale strains, Belgian       Flocculation: High         OYL-024       As one of the few highly flocculent Belgian house strain: it crops easily and has a well-rounded flavor profile with balanced fruitiness and phenolics. Esters increase with upward temperatures.       Flocculation: High Attenuation: 72–85% Temperature Range: 65–78°F (18–26°C) Alcohol Tolerance: 12%	Compares to: WY3522, WLP550 See Engineered Version: Sundew (OYL-401)
	Compares to: WY3787, WLP530
BELGIAN SAISON II OYL-042* Thought to originate from a small, sophisticated, Belgian brewer's spelt saison. It is earthy, spicy, peppery, tart, and dry, with tropical fruit and citrus at warm fermentation temperatures. A perfect strain for farmhouse ales and saisons. It favors pitching in the low 70s (21°C) and free-rising from there	Compares to: WY3726
FRENCH SAISON OYL-026*       This citrusy, lightly phenolic saison strain is so attenuative and reliable in performance that people joke it could ferment a shoe. The French Saison strain results in great body consistency. It is good for any of the characteristically aromatic Belgian styles and is highly compatible with hops and spice aromas.       Flocculation: Low Attenuation: 80–90% Temperature Range: 65–77°F (18–25°C) Alcohol Tolerance: 12%	Compares to: WY3711 See Hybrid Versions: Gulo (OYL-501) Saisonstein (OYL-026)
JOVARU LITHUANIAN       The famed Jovaru Brewery's historic strain, Jovaru comes from the queen of Lithuanian farmhouse beer herself. With citrusy esters and restrained phenols, expect lemon pith and black pepper character, and a soft mouthfeel. This unique yeast complements farmhouse beers and makes a great Wit. I sveikata!       Flocculation: Medium-Low         VPL-033*‡       Attenuation: 80–85%	Omega Yeast Exclusive
WITEnthusiastically top cropping, this essential Wit yeast is distinctive for the popular, refreshing, easy-drinking summer style. Spicy phenolics carry the flavoring, while at the same time being supported—but not overshadowed—by good ester character. Lightly tart and dry.Flocculation: Medium Attenuation: 72–76% Temperature Range: 62–75°F (17–24°C) Alcohol Tolerance: 11–12%	Compares to: WY3944, WLP400
ESPE KVEIK OYL-090       Originating from the village of Grodås in Norway, the Espe kveik blend offers the unique profile of lychee, pear, and tropical fruit cup. It bolsters the sweet aromatics of modern IPAs, but is versatile enough for your flagship pale ale or seasonal brew. Most expressive when fermented at 90°F+ (32°C+), Espe still reveals character at its lower temperature range.       Flocculation: Medium Attenuation: 75-82% Temperature Range: 68-95°F (20-35°C Alcohol Tolerance: 12%         HORNINDAL KVEIK I       A wonderfully unique Norwegian kveik, Hornindal's blend of       Flocculation: High	;)
HORNINDAL KVEIK &       A wonderfully unique Norwegian kveik, Hornindal's blend of cooperative strains produce a tropical flavor and complex aroma that can present as stone fruit, pineapple, and dried fruit leather, which complement fruit-forward hops. Add even more dimension to "C" hops and increase ester intensity with a high fermentation temperature. Ferments well at 90°F (32°C) or higher. Non-phenolic and no noticeable fusels, even at higher temperatures.       Flocculation: High Attenuation: 75–82%	)
HOTHEAD KVEIK       A highly flocculent Norwegian ale strain (kveik) with an astoundingly wide temperature range and little change in flavor across the range. Clean enough for both American and English styles, it has a unique honey-like aroma with overripe mango. It is complementary to modern, fruity hops. Temperature control is unnecessary with this strain. Non-phenolic and no noticeable fusels, even at higher       Flocculation: Medium-High Attenuation: 75–82%	:)
LUTRA KVEIK O       Isolated from our Hornindal Kveik (OYL-091) culture, Lutra is shockingly clean with unrivaled speed when pitched at 90°F       Flocculation: Medium-High Attenuation: 75–82%         OYL-071       (32°C). The strain is perfect for brewing an even more neutral and refreshing pseudo-lager at its lower temperatures, without the lead time of a traditional lager yeast. Lutra is your worry-free way to navigate the evolving demand for cold ones.       Flocculation: Medium-High Attenuation: 75–82%	Omega Yeast Exclusive
DRIED LUTRA KVEIK       The same shockingly clean Lutra that you love in liquid form is now in a convenient dry format. Dried Lutra's clean canvas, huge temperature range, high alcohol tolerance and fast finishing speeds mean unrivaled flexibility and versatility for nearly any style. For any reason you're using a neutral dry yeast, use Dried Lutra and get more, faster.       Flocculation: Medium-High Attenuation: 75–82%	Omega Yeast Exclusive
VOSS KVEIK ¿       A traditional Norwegian kveik from the Gjernes farmstead, Voss       Flocculation: Medium         OYL-061       A traditional Norwegian kveik from the Gjernes farmstead, Voss       Flocculation: Medium         Norus       A traditional Norwegian kveik from the Gjernes farmstead, Voss       Flocculation: Medium         Norus       A traditional Norwegian kveik from the Gjernes farmstead, Voss       Flocculation: Medium         Attenuation: 75–82%       Temperature Range: 68–95°F (20–35°C         With this strain. No noticeable fusels, even at higher temperatures.       Alcohol Tolerance: 12%	See Engineered Version: Vossa Nova (OYL-407) )
ALL THE BRETTS OYL-218 An evolving blend of many of the Brett strains in our collection. Use in secondary and expect high attenuation and a fruity and funky complexity that continues to develop over time. An evolving blend of many of the Brett strains in our collection. Solution: Low Attenuation: 85%+ Temperature Range: 70–85°F (21–29°C Alcohol Tolerance: 11%	Omega Yeast Exclusive
BRETT BLEND #3 BRING ON DA FUNK OYL-212* OYL-212* OYL-212* One Sacch strain from Brett Blend #1 (OYL-210) spiked with both brux and lambicus, plus two additional Brett isolates from a Brett- famous brewery, plus two Brett isolates from a mintense" Belgian source equals a funky, fruity, complex, 7-strain composition. Brett character develops over time (as will acid production if exposed to oxygen).	Omega Yeast Exclusive
BRETTANOMYCES       The mildest on the Brett funkiness spectrum, Brett claussenii       Flocculation: Low         CLAUSSENII       presents more of a leathery earthiness and some pineapple—both       Attenuation: 85%+         OYL-201       alone. It does its best work as a secondary yeast. This strain is       The minded to be used for 100% Brett primary fermentation.       Flocculation: Low	Compares to: WLP645
C2C AMERICAN FARMHOUSE O'L-217*       A "coast to coast" blend of one saison strain from a famous Northeast U.S. brewery and one Brett strain from a Northwest U.S. brewery. The blend quickly produces a pleasantly dry beer, filled out with aromas of white wine, hay, and mulled citrus.       Flocculation: Low Attenuation: 70–85% Temperature Range: 68–80°F (20–27°C Alcohol Tolerance: 10%         LACTO O OYL-605       A <i>Lactobacillus brevis</i> and <i>plantarum</i> blend with a wide temperature range. The <i>L. plantarum</i> , isolated in collaboration with Marz Community Brewing, sours efficiently at its higher end. Do not sour above 95°F (35°C) to prevent stalling. Max souring develops within 24 to 72 hrs. Extremely hop sensitive. Even 2 IBUs can prevent souring.       Temperature Range: 68–95°F (20–35°C	

ってし	OYL-114 temperature range and flocculates well with minimal diacetyl production. Attenuation: 72–76% temperature range in maltier styles, including dunkels & Märzens. Temperature Range: 51–62°F (11–17°C)			
	GERMAN BOCK OYL-111	Thought to be from Aying, Bavaria, this is a versatile lager strain that balances malt and hop flavors well. It is superb for bocks, doppelbocks, Oktoberfest lagers, helles and a favorite for American pilsners, too.	Flocculation: Medium Attenuation: 70–76% Temperature Range: 48–55°F (9–13°C) Alcohol Tolerance: 10%	Compares to: WLP833
	GERMAN LAGER I 👌 OYL-106	Versatile, crisp, malty profile, light esters, and a wide fermentation range. Thought to be the world's most used lager strain and can produce a convincing lager at ale temps. Fermenting in the low temp range 45–55°F (7–13°F), it maintains a more crisp profile. Temperatures higher in range 65–68°F (18–20°C) bring out slightly heightened esters. Rest for diacetyl.	Flocculation: Medium-Low Attenuation: 73–77% Temperature Range: 45–68°F (7–20°C) Alcohol Tolerance: 9%	Compares to: WY2124, WLP830 See Engineered Version: German Lager I <b>+</b> (OYL-437)
	MEXICAN LAGER 👌 OYL-113	This great lager strain is thought to originate from a well known Mexican brewery. Simply put, it is clean, crisp, bright, and versatile.	Flocculation: Medium Attenuation: 70–78% Temperature Range: 50–55°F (10–13°C) Alcohol Tolerance: 9%	Compares to: WLP940 See Engineered Version: Lunar Crush (OYL-403)
	OKTOBERFEST 👌 OYL-107	Fans of Märzenbier and Oktoberfest lagers particularly enjoy this strain. The Oktoberfest strain facilitates a smooth, rich, balanced beer with full, malty profile. Make sure to give it a thorough diacetyl rest.	Flocculation: Medium-High Attenuation: 73–77% Temperature Range: 46–58°F (8–14°C) Alcohol Tolerance: 9%	Compares to: WY2206, WLP820
	PILSNER I OYL-101	Thought to be the H strain of the famous Plzen brewer, this lager strain has a dry and neutral taste profile and is gently malty with a lightly perceptible floral aroma. The first of the famous Czech strains inspiring America's most famous light, brilliantly clear, golden lagers. Commonly produces sulfur during fermentation that clears during lagering. Watch out for diacetyl.	Flocculation: Medium-High Attenuation: 72–76% Temperature Range: 48–56°F (9–13°C) Alcohol Tolerance: 9%	Compares to: WY2001, WLP800

## **HYBRIDS** Hybrid strains for creative brewing

#### creative brewing

<b>GULO ALE</b> OYL-501* Patented	Expect orange-marmalade and peach character with a clean, brut-like finish. Gulo is the mated offspring of Irish Ale (OYL-005) and French Saison (OYL- 026) with the best of the Irish strain's flavor, and the powerful attenuation of the French. Non phenolic, aromatic and a beast at devouring wort sugars, think suitability for an IPA (including brut IPA), stout or bière de garde.	Style: Ale Flocculation: Medium Attenuation: 85–90% Temperature Range: 68–77°F (20–25°C) Alcohol Tolerance: 12%	Omega Yeast Exclusive See Parents: Irish Ale (OYL-005) French Saison (OYL-026)
SAISONSTEIN 👌 OYL-500*	Saisonstein is an Omega Yeast original—a genetic hybrid of two Saison strains, the French (OYL-026) and Belgian (OYL-027). It is versatile, aromatic and attenuative with a silky mouthfeel. It excels in high gravity and ferments more reliably and thoroughly than its parents. It is spicy, complex, tart, dry, and crisp with some bubblegum character from its Belgian parent, and more fruit and fewer phenolics than its French parent. Attenuation is 80–90% or more.	Style: Belgian Ale Flocculation: Low Attenuation: 80–90% Temperature Range: 65–78°F (18–26°C) Alcohol Tolerance: 11%	Omega Yeast Exclusive See Parents: Belgian Saison I (OYL-027) French Saison (OYL-026)

### ENGINEERED

TECHNOLOGY TO YOUR LIFE EASIER

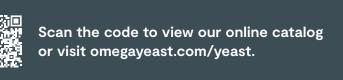

An ever-evolving array yeast designed for new better experiences, o goal is to provide mod tools enabling brewers explore newness and h optimized experiences

old favorites.

Modified strains for inventive brewing

MAKE	THIOLIZED	— (DKO <sup>11</sup> )		POF
y of v and ir ern s to nave s with	Enhanced ability to biotransform bound thiols into aromatic and flavorful characteristics reminiscent of pungent grapefruit, passionfruit, and guava.	Diacetyl Knock Out (DKO) knocks out diacetyl formation before it starts. Engineered to express the ALDC enzyme and keep diacetyl so low, it's undetectable.	The easiest way to create clear beer. A bioengineered technology that develops translucent beer while maintaining parental strain behavior.	We took out the phenolic gene to unmask once hidden flavors and aromatics in well known strains. All the esters with none of the clove-like phenolics.

BANANZA OYL-400 (US+CA only)	Ripe banana esters (with a hint of pear) make this new, Omega Yeast original a standout for pastry stouts, milkshake IPAs and other modern ales. For prime banana esters, pitch at 68°F (20°C) and let free rise to 72–75°F (22– 24°C). Unlike its parental Hefeweizen strain, Bananza is versatile because it is non-phenolic and therefore incapable of producing clove flavors that would mask its pure banana profile.	Style: Ale Flocculation: Low Attenuation: 73–77% Temperature Range: 64–75°F (18–24°C) Alcohol Tolerance: 10%	Omega Yeast Exclusive See Parent: Hefeweizen Ale I (OYL-(
COSMIC PUNCH OYL-402 (US+CA only) THIOLIZED	A Thiolized version of our popular hazy strain, British Ale V (OYL-011), Cosmic Punch generates thiols through biotransformation, releasing tropical aromas experienced in southern hemisphere hops and New Zealand Sauvignon Blanc. This punchy strain unleashes vibrant grapefruit, passion fruit and guava notes. Expect the same performance and haze you get from British V, but with additional thiol aromas. Experiment with mash hopping or wine grape-derived products to push even more thiols.	Style: Ale Flocculation: High Attenuation: 71–75% Temperature Range: 64–75°F (18–24°C) Alcohol Tolerance: 10%	Omega Yeast Exclusive See Parent: British Ale V (OYL-011)
HELIO GAZER 👌 OYL-405 (US only) THIOLIZED	With enhanced Thiolized capabilities, Helio Gazer boosts thiol biotransfor- mation to free thiols 200x above sensory threshold, creating a supernova of tropical, passion fruit flavors and aromas. Even in the juiciest of IPAs, expect robust guava and New Zealand sauvignon blanc-like aromas along with the beloved sturdy haziness of its parent strain, British Ale V. Pair with mash hopping, grape-derived products or regional malt and hops for peak thiols.	Style: Ale Flocculation: High Attenuation: 71–75% Temperature Range: 64–74°F (18–23°C) Alcohol Tolerance: 10%	Omega Yeast Exclusive See Parent: British Ale V (OYL-011)
OYL-406 (US only)	Little DIPA is a Thiolized version of the "Conan" strain DIPA Ale, widely used for DIPAs and New England IPAs. Little DIPA pairs its signature peach ring and apricot aromas with robust thiols and adds a little boost to your hoppy beers. Expect no diacetyl production.	Style: Ale Flocculation: Medium-Low Attenuation: 72–80% Temperature Range: 65–72°F (18–22°C) Alcohol Tolerance: 11%	Omega Yeast Exclusive See Parent: DIPA Ale (OYL-052)
LUNAR CRUSH LAGER OYL-403 (US only) THIOLIZED	Put a spin on lager brewing with Lunar Crush, our distinctively tropical Thiolized lager strain. Lunar Crush biotransforms thiol precursors from malt, hops, and grape-derived products for a new wave of passion fruit, guava, and New Zealand Sauvignon blanc fruitiness. This isn't your typical lager yeast—Lunar Crush is the perfect companion for complex, hop-forward styles or even creating something entirely new by simplifying your recipe for the boldest thiol expression.	Style: Lager Flocculation: Medium Attenuation: 70–78% Temperature Range: 50–65°F (10–18°C) Alcohol Tolerance: 9%	Omega Yeast Exclusive See Parent: Mexican Lager (OYL-113
STAR PARTY 👌 OYL-404 (US only)	A Thiolized version of the beloved Chico strain (West Coast Ale I), Star Party is a thiol burst with aromas of passion fruit, dank pink guava, and citrus zest. Expect the same clean fermentation profile and clarity as its parental strain, Chico, but with a big burst of thiols that's perfect for redefining classic styles, juicing up a West Coast IPA, or creating a unique style that highlights the thiol potential of regional hops and malt. Thiols to the moon!	Style: Ale Flocculation: Medium-Low Attenuation: 73–80% Temperature Range: 60–73°F (16–23°C) Alcohol Tolerance: 11%	Omega Yeast Exclusive See Parent: West Coast Ale I (OYL-00
SUNDEW OYL-401 (US+CA only)	Sundew's ripe strawberry, pear, and stone fruit combine to emphasize desirable notes in modern fruity hops. This Omega Yeast original strain was inspired by its parental strain's fruit esters, which were originally obscured by Belgian phenolic character. Sundew, however, is non-phenolic and incapable of producing the spicy clove flavors that were previously competing with its pure, juicy red-fruit bouquet.	Style: Ale Flocculation: High Attenuation: 72–85% Temperature Range: 64–78°F (18–26°C) Alcohol Tolerance: 12%	Omega Yeast Exclusive See Parent: Belgian Ale A (OYL-024)
OYL-407 (US only) THIDLIZED DKD	Vossa Nova is a Thiolized version of Voss Kveik, known for reliable haze and tangy citrus notes. Our only kveik in the Thiolized series allows for a broad temperature range and control of the fermentation speed to your liking. Expect lower thiol intensity at hotter temps due to more vigorous blow off, along with no diacetyl production.	Style: Kveik Flocculation: Medium Attenuation: 75–82% Temperature Range: 68–95°F (20–35°C) Alcohol Tolerance: 12%	Omega Yeast Exclusive See Parent: Voss Kveik (OYL-061)
⊛ PLUS	Sharpened tools for optimized brewing—familiar strains, bioenginee enhance our strains, you can expect the same flavor and aromatic s most efficiently.		
GERMAN LAGER I + OYL-437 (US only)	One of the world's most prominent lager strains. Sports a versatile malty profile with light esters at a wide fermentation range. Maintain a more crisp profile by fermenting low or bring out slightly heightened esters at warmer temps (65–68°F). Avoid any hints of diacetyl and up your lager game.	Style: Lager Flocculation: Medium-Low Attenuation: 73–77% Temperature Range: 45–68°F (7–20°C) Alcohol Tolerance: 9%	Omega Yeast Exclusive See Parent: German Lager I (OYL-10
OYL-430 (US only)	"Chico" at its best form. This workhorse utilizes DKO and Lumina Technologies, which gives you clean, crystal-clear beer without lingering diacetyl or haze. The yeast is well attenuative and moderately flocculating, with crisp, citrus notes when fermented under 66°F (19°C).	Style: Ale Flocculation: Medium-Low Attenuation: 73–80% Temperature Range: 60–73°F (16–23°C)	Omega Yeast Exclusive See Parent: West Coast Ale I (OYL-00

\*This strain tests positive for the STA1 gene, an indicator of Saccharomyces cerevisiae var. diastaticus. This strain may have the ability to metabolize dextrins over time, resulting in higher than expected attenuation.

While we would love to make all strains available internationally, many countries' regulations do not yet allow the sale of organisms developed using modern gene-editing, regardless of the type of modification introduced by the technique. Please feel free to
